SECRETARY'S REPORT

THE first meeting of the 19650~~1~~1966 season was held in the Society's regular location on Monday, September 13th at 7:30PM. Our new President Al Graf, W1OQP led the discussion.

After the reading of the Treasurer and Secretary's reports, President Graff left the meeting open for general discussion. Bill Emerson set the theme by commenting about the site of the early Marconi station located at Wellfleet on Cape Cod. Al Graf and many other contributed much information about early spark transmitters. Particularly noteworthy was their inefficiency, in comparison with today's modern rigs.

The meeting then featured an ARRL Movie on the "repair and maintenance of Printed circuits". This movie had many practical ideas for ~~XXXXXXX~~ the repair of our modern transmitters.

The formal meeting was then adjourned and refreshments were served. ~~What was discussed during the coffee yoursecretary was unable to record.~~ HI HI

Respectfully submitted.
